Steam Humidification for Health and Wellness

Humidity at home between 40-60% RH is a must for wellness and comfort. Ensuring your indoor air is maintained in this ideal range, especially during the heating season, has been scientifically proven to:

- Reduces illness due to viruses, fungi, and bacteria and improves immune system response
- Improved sleep quality
- Reduces fatigue, dry skin, sore throats, headaches, and tired eyes
- Provides relief from allergies and asthma while minimizing airborne dust and pollutants

Energy Efficient Steam Humidification

Condair HumiLife Whole-Home Steam Humidifiers have an atmospheric steam generator that uses heat generated by an electrical current flowing between submerged electrodes to generate steam.

L1: Higher amp draw when more of the electrode is submerged.

L2: Lower amp draw when volume of water decreases.

Condair steam humidifiers are the trusted choice worldwide.
